

Streamlining Ticket Assignment For Efficient Support Operations

Team Id: NM2025TMID13167

Team Members: 4

Team Leader: JAYALAKSHMI.M

Team Member 1 : HARINI .R

Team Member 2 : SARASWATHI.H

Team Member 3 : SUJI.T

Problem Statement: In many support operations, ticket assignment is done manually or through inefficient processes, which often leads to delays, misrouting of requests, uneven workload distribution among agents, and poor customer satisfaction. The lack of an optimized system for assigning tickets results in longer resolution times and decreased efficiency in handling customer issues.

Therefore, there is a need to streamline the ticket assignment process to ensure that support requests are routed to the right team or agent quickly and accurately.

Objective:

“Streamlining Ticket Assignment for Efficient Support Operations”

Streamlining → making a process simpler, faster, and smoother.

Ticket Assignment → deciding which support request (ticket) should go to which support agent or team.

Efficient Support Operations → running customer support in a way that saves time, reduces errors, and improves service quality.

TASK INTENTION

Milestone 1 : Users

Activity 1: Create Users

Open service now

Click on All >> search for users

Select Users under system security

Click on new

Fill the following details to create a new user

The screenshot shows the 'User - New Record' form in the ServiceNow interface. The browser address bar shows the URL: dev265869.service-now.com/now/nav/ui/classic/params/target/sys_user.do%3Fsys_id%3D-1%26sys_js_list%3Dtrue%26s... The form has a dark header with navigation tabs: All, Favorites, History, Workspaces, Admin. The main title is 'User - New Record' with a star icon. Below the title is a sub-header 'User New record' and a 'Submit' button. A blue notification bar at the top of the form says: 'To set up the User's password, save the record and then click Set Password.' The form fields are organized into two columns. The left column contains: 'User ID' (text input), 'First name' (text input), 'Last name' (text input), 'Title' (text input with a help icon), 'Department' (text input with a search icon), 'Password needs reset' (checkbox), 'Locked out' (checkbox), 'Active' (checkbox, checked), 'Web service access only' (checkbox), and 'Internal Integration User' (checkbox). The right column contains: 'Email' (text input with an email icon), 'Language' (dropdown menu, set to '-- None --'), 'Calendar integration' (dropdown menu, set to 'Outlook'), 'Time zone' (dropdown menu, set to 'System (GMT)'), 'Date format' (dropdown menu, set to 'System (dd-MM-yyyy)'), 'Business phone' (text input), 'Mobile phone' (text input), and 'Photo' (text input with a 'Click to add...' link).

Click on submit

Create one more user: Create another user with the following details

Activity 1: Create Groups

1. Open service now.
2. Click on All >> search for groups
3. Select groups under system security
4. Click on new
5. Fill the following details to create a new group
6. Click on submit

The screenshot shows a web browser window with the URL `naanmudhalvan.smartinternz.com/Student/guided_project_workspace/22800`. The page displays a 'GENERAL INSTRUCTION' section with a 'SHOW' button. Below this are three buttons: 'Demo Link', 'View Mentor Comments' (with a red notification badge showing '0'), and 'View Industry Mentor Comments' (with a red notification badge showing '0'). The main content area has three tabs: 'PROJECT DETAILS', 'TASK & PROGRESS', and 'MENTOR REVIEW'. Under 'PROJECT DETAILS', there is a toggle switch for 'Team Tasks' (currently off) and 'My Tasks' (currently on). Below the toggle are four input fields: 'USERS', 'GROUPS', 'ROLES' (with a mouse cursor hovering over it), and 'TABLE'. At the bottom of the form is a button labeled 'ASSIGN ROLES & USERS TO GROUPS'.

Milestone 3 : Roles

Activity 1: Create roles

1. Open service now.
2. Click on All >> search for roles
3. Select roles under system security
4. Click on new
5. Fill the following details to create a new role
6. Click on submit

The screenshot shows the ServiceNow Roles page. The breadcrumb trail is "All > Name starts with cer". The table below lists roles related to certification.

Name	Description	Elevated privilege
cer	Search	Search
certification	Can work Certification tasks	false
certification_admin	Can manage the Certification application	false
certification_filter_admin	Can manage Certification Filters	false
Certification_role	Deals with Certificate related issues	false

At the bottom of the page, there is a pagination indicator showing "1 to 4 of 4".

Create one more role:

7. Create another role with the following details
8. Click on submit

Milestone 4 : Table

Activity 1: Create Table

1. Open service now.
2. Click on All >> search for tables
3. Select tables under system definition
4. Click on new
5. Fill the following details to create a new table

Label : project table

Check the boxes Create module & Create mobile module

6. Under new menu name : project table
7. Under table columns give the columns

Name	Description	Elevated privilege
cer	Search	Search
certification	Can work Certification tasks	false
certification_admin	Can manage the Certification application	false
certification_filter_admin	Can manage Certification Filters	false
Certification_role	Deals with Certificate related issues	false

Milestone 4 : Table

Activity 1: Create Table

1. Open service now.
2. Click on All >> search for tables
3. Select tables under system definition
4. Click on new
5. Fill the following details to create a new table

Label : project table

Check the boxes Create module & Create mobile module

6. Under new menu name : project table
7. Under table columns give the column

8. Click on submit

The screenshot shows the ServiceNow 'Table - New Record' form. The form is titled 'Table - New Record' and has a search bar. The main form area contains the following fields:

- Name:** u_project_table
- Extends table:** (empty)
- Create module:** ☒
- Create mobile module:** ☒
- Add module to menu:** -- Create new --
- New menu name:** project table

Below the main form, there is a 'Columns' tab. The 'Columns' tab is active, showing a table of 'Dictionary Entries'.

	Column label	Type	Reference	Max length	Default value	Display
☒	project id	Integer				false
☒	project name	String				false
☒	project manger	String				false
☒	start date	Date				false
☒	end date	Date				false
☒	status	Choice				false
☒	description	String				false

Create one more table:

9.Create another table as:task table 2 and fill with following details.

10. Click on submit.

Milestone 5 : Assign Roles & Usrs to certificate group

Activity 1: Assign users to project team group

1. Open service now.
2. Click on All >> search for groups
3. Select tables under system definition
4. Select the project team group
5. Under group members
6. Click on edit

The screenshot shows a web browser window with the URL naanmudhalvan.smartinternz.com/Student/guided_project_info/22800#. The page title is "Assign Roles & Users to Certificate Group". On the left, there is a sidebar with several orange and red buttons, including "Assign Roles & Users to Certificate Group". The main content area displays a list of steps:

1. Open service now.
2. Click on All >> search for tables
3. Select tables under system definition
4. Select the certificates group
5. Under group members
6. Click on edit
7. Select Katherine Pierce and save
8. Click on roles
9. Select Certification_role and save

Milestone 6 : Assign roles to table

Activity 1: Assign roles to alice user

1. Open servicenow. Click on All >> search for user
2. Select tables under system definition
3. Select the project manager user
4. Under project manager
5. Click on edit
6. Select project member and save
7. click on edit add u_project_table role and u_task_table role
8. click on save and update the form

Create ACL

1. Open service now.
2. Click on All >> search for ACL
3. Select Access Control(ACL) under system security
4. Click on now
5. Fill the following details to create a new ACL
6. Scroll down under requires role
7. Double click on insert a new row

8. Give admin role

9. Click on submit

10. Similarly create 4 acl for the following fields

Name	Decision Type	Operation	Type	Active	Updated by	Updated
u_operations_related.u_service_request_no	Allow If	write	record	true	admin	2025-06-19 09:42:10

Create A Flow To Assign Operations Ticket To Group

1. Open service now.

The screenshot shows the 'Regarding Platform' flow in ServiceNow Flow Designer. The trigger is set to 'Created' for the 'Operations related' table. The condition is 'All of these conditions must be met' with three criteria: 'Operations related [u_operation...]', 'Run Start Time UTC', and 'Run Start Date/Time'. The flow is currently 'Active'.

2. Click on All >> search for Flow Designer

3. Click on Flow Designer under Process Automation.

4. After opening Flow Designer Click on new and select Flow.

5. Under Flow properties Give Flow Name as "Regarding Certificate".

6. Application should be Global

7. Select Run user as System user from that choice.

8. Click on Submit

Create A Flow To Assign Operations Ticket To Platform Group

1. Click on Add a trigger
2. Select the trigger in that Search for "create or update a record" and select that.
3. Give the table name as "Operations related"

4. Give the Condition as

Field: issue

Operator: is

Value: Unable to login to platform

5. Click on New Criteria

Field: issue

Operator: is

Value: 404 Error

6. Click on New Criteria

Field: issue

Operator: is

Value: Regrading User expired

7. After that click on Done.
8. Now under Actions.
9. Click on Add an action
10. Select action in that search for Update Record"
11. In Record field drag the fields from the data navigation from left side
12. Table will be auto assigned after that
13. Give the field as Assigned to group"
14. Give value as" Platform"
15. Click on Done.
16. Click on Save to save the Flow.
17. Click on Activate.

Conclusion

The implementation of the automated ticket routing system at ABC Corporation has been a significant success. By leveraging the capabilities of ServiceNow, we have streamlined the process of assigning support tickets to the appropriate teams, addressing the challenges of manual routing, and ensuring timely resolution issues.
